EGYLandscape Project

Land and Landscapes in Mamluk and Ottoman Egypt, 13th-18th Centuries

The EGYLandscape Project is a three-year, ANR/DFG funded research project that aims to explore the historical landscapes, agriculture, nature, and climate of Egypt throughout the Mamluk and Ottoman periods. A first-of-its-kind program, the team is comprised of leading and upcoming scholars in a diverse array of specialties including archaeology, history, and environmental studies. The EGYLandscape Project is committed to developing new resources for the wider academic community including GIS and other data types. A mapping project, "Survey of Medieval Egypt", will begin in the late fall of 2019.

Project Leaders:

Nicolas Michel (*Aix-Marseille University*): nicolas.michel24@wanadoo.fr
