

**Application form for a planned Material Transfer Agreement (MTA)  
as provider**

Philipps-Universität Marburg

Der Präsident

Dez. I – Transfer

Biegenstraße 10

Hauspost

Applicant:

Name:

Faculty / Center:

Mail address:

Date:

**I request an MTA with the following information:**

**1.) Recipient's Institution full name and place of business:**

**2.) Recipient Scientist's name, full address, telephone number and e-mail:**

**3.) Recipient authorized official's name, full address, telephone number and e-mail:**

**4.) Address to send the Material to:**

### 5.) Purpose:

*Here you have to define the purpose for which the recipient will receive the material. If possible, please name the project title or the research project as precisely as possible. If necessary, have the recipient fill this out.*

### 6.) Material:

*Please provide a generally understandable name of the material that sufficiently defines the material as well as the quantity of the material to be transferred. Often the material is not sufficiently described by the name alone, so please also provide a short description or a reference by which the material is described.*

### 7.) Created by...?

*Please indicate the name of the scientists who have developed the material. You should ask yourself: Did you get the material from a third party and not develop it yourself at UMR? Did you bring the material to UMR coming from another institute? Were scientists from other institutes involved in the development?*

### 8.) Export control

*As the provider, please check whether the material is subject to restrictions under foreign trade law, i.e. whether it belongs, for example, to the so-called dual-use goods that can be used for both civilian and military purposes (e.g. chemicals, biological substances and GvOs, computers with special specifications, sensors and lasers, etc..). Goods subject to licensing can be found in Annex I of Regulation (EU) 2021/821 ("EU Dual-Use Regulation") and Part I of the Export List of the Foreign Trade and Payments Regulation (Annex to the AWV).*

*Example biomaterials and GMOs: Annex I of the Dual-Use Regulation, Part III, Category 1 C Materials and substances is to be checked here. Human and animal pathogens and toxins are listed under 1C351. Genetic elements or GMOs are included under 1C353, and plant pathogens are additionally included under 1C354.*

**Is an approval needed?**

Yes

No

**9.) Starting date and term (in months):**

start:	term:	months
--------	-------	--------

**The Material is used for non-commercial purposes only:**

yes       no

**After completion of the MTA, the Material should be**

returned     destroyed

**If you have any questions or doubts about individual points when filling out the form, please contact: [forschungstransfer@uni-marburg.de](mailto:forschungstransfer@uni-marburg.de)**
